

# 2019 INTERNATIONAL SYMPOSIUM ON GALLIFORMES

## *First Announcement*

Galliformes are an order of ground-feeding birds that include pheasants, partridges, cracids, grouse and megapodes. Viet Nature is committed to conserving Vietnam's wildlife and to returning the critically endangered Edwards's Pheasant to its natural habitat in

Central Vietnam. The World Pheasant Association (WPA) is committed to the study and conservation of Galliformes and the habitats they depend upon, both in captivity and in the wild to prevent their extinction. WPA holds international symposia on Galliformes regularly around the world. With the aim of encouraging better international communication and cooperation, the 7th International Symposium on Galliformes will be held on 23<sup>rd</sup>-24<sup>th</sup> September in Dong Hoi, Quang Binh Province.

### **CONTENT**

Communication of researches and conservation on Galliformes (pheasants, partridges, cracids, grouse and megapodes), as well as sustainable management; with focus on threatened species and their habitat.

Participants who are to give oral presentation or posters please submit abstract while registering. The deadline for submission will be 1<sup>st</sup> July, 2019. The abstract is to include title, authors, affiliation, summary of studies and key words, following the style of *Avian Research* (<http://www.avianres.com/>), and no more than 500 words. A collection of abstracts will be published before the symposium.
