October 28, 2015

Dear friends concerned for migratory birds,

Piercing cold wind is coming and yellow leaves float down. With recent temperatures dropping, cranes and waterbirds are moving south. We will soon have the peak period for migratory birds in southern wetlands.

This coming weekend (October 31) will be our third synchronized count. Let's go to the wetlands for meeting birds and more beautiful scenery.

Have good bird watching days!

Working Group of Cranes and Waterbirds Monitoring Network.
